

This letter expresses my interest in your posting for a PHP software developer position at Networkninja. I am a progress-focused software engineer with at least 4 years of long-standing background in backend development. I am confident I can be an asset to your organization.

Working in my current job at Roamtech Technologies, I have a year of experience with systems architecture and full-stack web development in PHP. Working with a Senior Software Engineer, I have been responsible for developing and integrating new clients to our VAS ussd service serving a million users monthly. I also oversee the building of systems architecture via laravel framework, HTML5, and JavaScript. I have also recently gained experience in DevOps, building deployment containers using docker and Nginx, and championing introduction lifecycle environments which made it easier for new developers to test and improve on our architectures and solutions.

I enjoy being challenged and engaging with projects that require me to work outside my comfort and knowledge set, as continuing to learn new languages and development techniques that are important to me and the success of your organization.

Please consider my qualifications and experience:

- Highly skilled in designing, testing, and developing software
- Knowledge and experience in a microservices architecture
- Knowledgeable of back-end development best practices
- Hands-on experience in writing relational database queries for Mysql, MariaDB, and Postgres
- Hands-on experience in Node and Express JS, PHP, and Python
- 4 years of experience as a Python developer in all stages of the application development lifecycle with excellent programming knowledge using Python, Django & AngularJS.
- A year of experience as a PHP developer in all stages of the application development lifecycle with excellent programming knowledge using Laravel and Vanilla PHP in some cases.
- Proven track record of proper documentation for future maintenance and upgrades

Thank you for your time and consideration. I look forward to speaking with you

about this opportunity.

Best,

Kevin Alwavega
